## IMPLEMENTATION ANALYST

Implementation Analyst with **2 years** of experience in system configuration, data migration and validation, and incident/problem management. Experienced in business requirements gathering, functional specifications, and workflow optimization to align technical solutions with business objectives. Proficient in **SQL**, data mapping and transformation, and supporting **UI/UX** teams for user-centric designs. Strong knowledge of Agile, Scrum, and Waterfall methodologies, with a proven ability to streamline processes, mitigate risks, and ensure seamless system performance in dynamic environments.

## STRENGTHS AND EXPERTISE

Data Mapping & Transformation  
SQL (Queries for Validation)  
Agile, Scrum & Waterfall  
Methodologies  
HTML, CSS, JavaScript for front-end understanding

Wireframe & Workflow Design Support  
UAT (User Acceptance Testing) Support  
Functional Specifications & Gap Analysis  
Business Requirements Gathering & Analysis

Data Migration & Validation  
Incident & Problem  
Management  
UI/UX Collaboration for better user experience

## PROFESSIONAL EXPERIENCE

### AON Consulting Pvt. Ltd.

#### Configuration Analyst II

January 2024 - Present

Contributed to multiple global projects by managing system configurations, performing data migrations, and aligning **technical solutions** with business objectives. Delivered **optimized workflows** and ensured high-quality system outputs through **testing** and cross-team collaboration.

#### Accomplishments:

- Led data migration and validation for system upgrades, ensuring complete data accuracy and minimal downtime.
- Managed incident and problem resolution, reducing resolution time through root cause analysis and preventive measures.
- Collaborated with UI/UX teams to enhance workflows, resulting in improved user satisfaction scores.
- Created SQL queries for validating configuration changes and maintaining data integrity.
- Supported wireframe and workflow design with cross-functional teams to streamline user processes.
- Participated in Agile, Scrum, and Waterfall methodologies to ensure timely delivery of product enhancements.
- Conducted gap analysis and prepared functional specifications to align technical solutions with business requirements.
- Assisted in User Acceptance Testing by preparing test cases and ensuring smooth production releases.

### Badho Technology

#### Program Manager

July 2023 - Oct 2023

Spearheaded the successful delivery of multiple projects as a Program Manager by aligning cross-functional teams, defining scopes, gathering requirements, and implementing **solutions** within strict timelines and budgets. **Optimized** workflows, mitigated **risks**, and ensured clear communication between stakeholders and technical teams, resulting in high-quality outcomes and enhanced **stakeholder** satisfaction.

### Accomplishments:

- Oversaw end-to-end program delivery, managing multiple projects simultaneously to ensure alignment with organizational goals.
- Coordinated with cross-functional teams to gather requirements, define project scopes, and deliver solutions on time and within budget.
- Monitored project progress, mitigated risks, and implemented process improvements for efficient execution.
- Facilitated clear communication between stakeholders and technical teams to achieve seamless program outcomes.
- Delivered high-quality results by prioritizing tasks, managing resources, and maintaining stakeholder satisfaction.

## ACCENTURE

### Support Executive (Intern)

June 2022 - Feb 2023

Worked as a Support Executive at Accenture, where I provided technical assistance to resolve system issues and supported data validation activities. Collaborated with teams to streamline workflows, improve process efficiency, and ensure accurate reporting. Gained hands-on experience in service delivery and incident management while contributing to smooth business operations in a fast-paced environment.

---

## EDUCATION

### Indian Institute of Technology (IIT) Dhanbad

B.Tech in Electronics and Instrumentation Engineering

July 2017 - May 2021

---

## PROJECTS & CERTIFICATIONS

### Startup201 | Certification | Product Management Bootcamp

- Gained insights into critical subjects including User Persona, Product Success Metrics, Product Design & Strategy. Addressed real-world case studies centered around Root Cause Analysis, Product Design, & Product Improvement. Crafted Product Requirement Docs outlining the software development cycle and system design for the product.

## SKILLS & RELEVANT COURSES

- **Configuration Analyst:** Onboarding, Stakeholder & Health Management, Renewals, Churn Reduction, Customer Advocacy, Web Scripting
  - **Communication:** Cross-Functional Alignment, Escalation Handling, Success Planning
  - **Data & Analysis:** SQL, Excel (VBA, Pivot Tables), NPS/CSAT Tracking, Dashboarding.
  - **Tools:** Gainsight, JIRA, CRM, Postman, Kentico, GI, Power BI, LLM, ML, GEN-AI,
  - **Coursework:** Product Management (PM School, Startup201)
-
